

Height Matched Chain Stopper

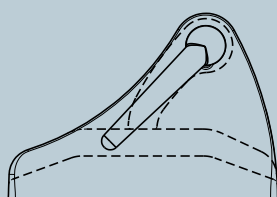

Windlasses are not designed to hold the high loads that can be transmitted through the chain when at anchor, the chain should be secured with a chain stopper or the rope secured to a cleat, bollard or some other load bearing point. Maxwell have created a new range of chain stoppers which are height matched to our popular RC series range of windlasses.

Features

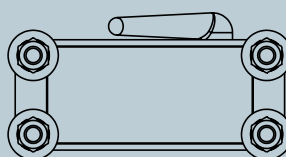

- Height matched to suit chain level of RC series windlasses which means no packers or plinths are necessary.
- Body and pin made from 316 stainless steel and pawl made from high strength 2205 stainless steel.
- Takes weight off the windlass and prevents accidental 'free fall' of the anchor while under way.
- Has a safe working load greater than the chains it is designed to work with (DIN766, G30 & G43).
- High quality mirror polished finish.
- Pawl shaped to match chain preventing damage to the galvanising caused by traditionally shaped pawls.

Item Codes	
Code	Item Description
P104358	Chain Stopper 8-10mm (5/16-3/8") chain to suit RC8
P104359	Chain Stopper 10-13mm (3/8-1/2") chain to suit RC10 & RC12
